Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a wheel monitor. Each independent claim identifies the uniquely distinct features "a wheel (not steering wheel) mounted to a hub, and a sensor to selectively generate a signal indicative of relative rotation between said wheel and said hub" in combination with the manner claimed. The closest prior art, Stoyka [US 5,552,759] discloses a sensor for sensing the relative movement between the wheel and the hub, wherein when the wheel removes from the hub, however, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
